

Multitrend® SX

Specification

X SERIES - ADVANCED GRAPHIC RECORDERS

43-TV-03-11

August 2006

Crystal Clear Display

- 12.1" Digital Colour LCD (TFT)
- SVGA Resolution (800 x 600 pixels)
- Clear and intuitive operation
- Industrial rugged Touch Screen with rapid navigation
- Custom Screens

Comprehensive Connectivity

- 10/100 Ethernet, (DHCP), Web, OPC Server
- TCP/IP and RS485 Modbus Protocol
- USB ports for keyboard and mouse

Data Storage

- On-board non-volatile memory - up to 2GB
- Removable Compact Flash and USB storage
- No moving parts - all solid state Flash memory

Security Stringent - Total Data integrity

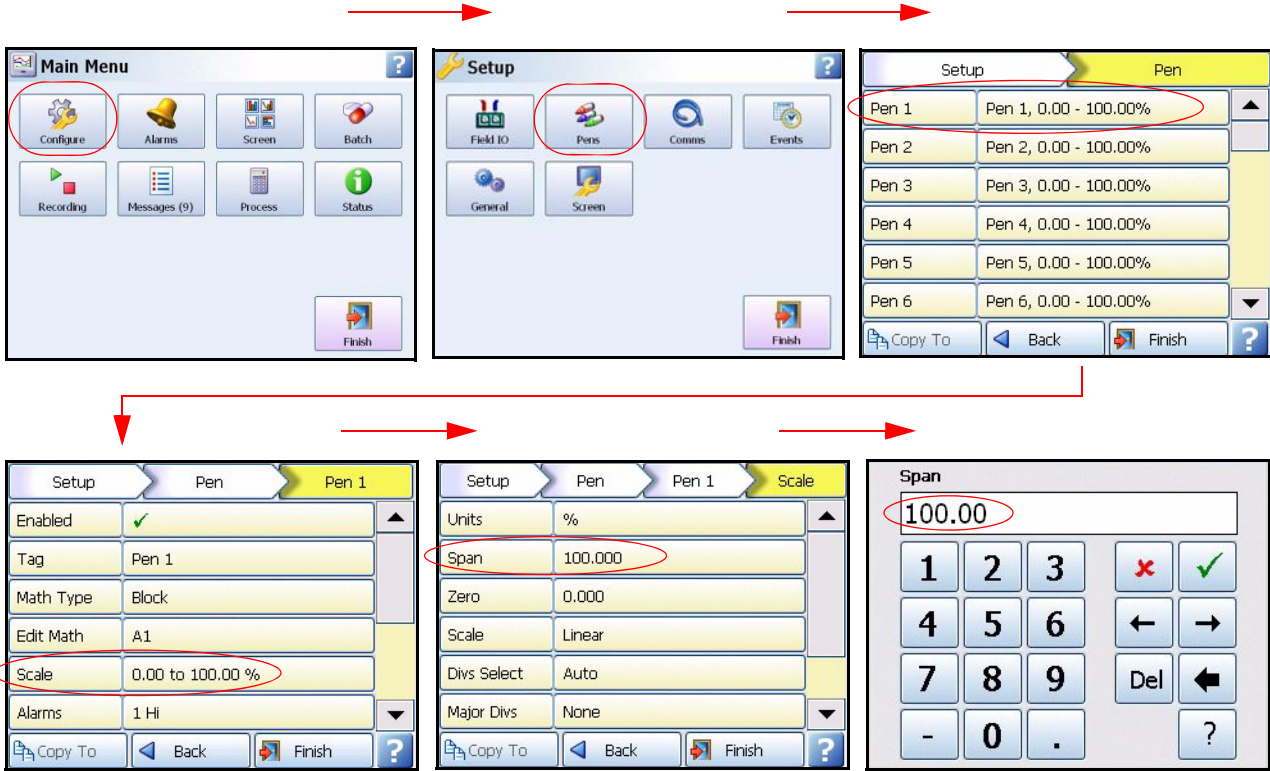

- Password Protection - 21CFR Part 11
- ESS - Extended Security System

Plus..

- Health Watch for preventative maintenance
- Remote Access - Advanced Software Data Analysis at your PC
- Independent Chart and Logging speeds
- Global Language Support
- Rapid review and replay of data at recorder
- Approvals - CE, CSA, UL, FM
- NEMA 4X / IP66 option
- Up to 50Hz (20 msec) Logging
- Up to 48 Analogue Inputs
- Remote Viewing Tool

Recorder Function

- Honeywell's Multitrend SX recorder provides flexible electronic data acquisition and recording in a high functionality large 12.1" diagonal display format recorder.
- Up to 48 Analogue inputs with at least 70MB of available on-board memory plus additional removable storage media.
- The Multitrend SX uses a digital colour TFT LCD screen to provide easy to read displays with wide viewing angles for the best all around data viewing.
- The touch screen operator interface provides fast, easy access to the recorder menus making set up and data analysis quick and efficient. Navigation through the menus and text entry are direct and intuitive.

Example of a recorder menu path from the Main Menu to Pen Scale configuration with clear rapid navigation

Features

Display

- **12.1" Colour Active TFT** - with more than 256,000 colours makes it easy to interpret process data and take action with the intuitive bar charts, digital values, trends or customised displays. A screen saver function can be set from 1 to 720 minutes to extend the life of the backlight.
- **Touch Screen** - the heavy duty durable touch screen provides easy data entry and rapid navigation through the menus.
- **Help Files** - A complete contextual help system can be accessed and visualised on the screen of the recorder.

Communications

- **Ethernet Connectivity** - the Ethernet (DHCP standard) connection, with support for various protocols, provides unlimited connectivity to local area networks (LANs). The standard Ethernet interface makes networking of the recorder to a LAN or the world wide web fast and convenient. Dynamic Host Configuration Protocol (DHCP) automatically acquires the settings (IP address) for network communications from a DHCP server.
- **RS485 Modbus** - the RS485 connection allows process data to be transferred to other devices or to record data received in MODBUS RTU protocol (slave mode only).
- **Simple Network Time Protocol (SNTP)** - The recorder can be synchronised over the ethernet network via a SNTP client or synchronise other recorders via a Server.

- **Web Server** - with the recorder connected to a LAN, all process variables, alarm and messages can be viewed from an internet browser with automatic refresh.

Data Storage

Internal Data Storage - At least 70MB expandable internal non-volatile flash memory is available for data storage and chart history.

Internal memory / Logging rate = 1 sec					
Pens	70MB	180MB	400MB	890MB	1850MB
16	12 days	30.5d	68.5d	150d	311d
32	6	15d	34d	75d	155d
48	4	10d	22d	50d	103d
96	2	5d	11d	25d	51d

Data Export - Removable compact flash and USB flash storage device provides multiple data storage alternatives. Data is stored in a secure binary encrypted format, with the recorder's configurations, providing added security of the data files.

Removable Compact flash and USB flash storage devices

External USB Devices

- The recorder has two USB host ports, front and rear, for attaching external USB devices such as a keyboard, mouse or a USB data storage key. The keyboard and mouse can be used to navigate the recorder's screen along with text entry.

Remote Viewer

- Extends the user interface of the recorder onto the desktop PC. Providing full remote control of the unit launched from a web browser. Compatible with Microsoft™ Internet explorer 6 and higher.

Security

- **Total Data Integrity** - data is stored in secure encrypted files making it easy to retrieve the data dependent on process information. Data is automatically recognised without having to remember file names.
- **Password Protection** - Up to 4 levels of password protection with up to 50 different users are available. Multiple levels of password protection and an audit trail of actions enhance the security of the data.
- **Extended Security System (option)** - ESS provides extended features including entry of unique User ID's and associated passwords, time-out of password entry, password expiration, and traceability of user actions. ESS is compatible with the requirements of 21CFR part 11.

Events

- Certain conditions or operations can be set up and logged according to the time and date of the occurrence. Subsequently events can be reviewed in a list or represented on a graph.

Batch

- Batch enhances the management of data collected in non-continuous process, known as batch processing, used in thermal treatment, sterilisation, food processing and chemical reactions

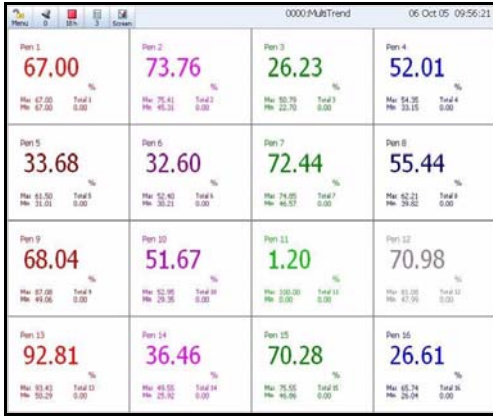

Other Standard features ..

- **CE Mark** - Conformity with 73/23/EEC, Low Voltage Directive and 89/336/EEC EMC Directive.
- **Soft Alarms** - 6 "software" alarms per pen are easily set up to display and record selected out-of-limit conditions. These can be tied to the relay or digital outputs to activate the user's external equipment.
- **Common Relay Output** - A separate relay alarm output at the rear of the unit can be set up as an alarm output.
- **Communications** - the recorder supports Modbus TCP/IP (slave mode), web over Ethernet (DHCP standard) communications port and Modbus RTU (slave mode) via an RS485 port. USB ports allow the use of an ASCII barcode reader.
- **Independent Display Chart Speeds and Logging rates** - logging rates can be programmed completely separate from the chart display speed, allowing the data to be displayed and stored at the rates that best suits the application.
- **Language Support** - standard language prompts for English, French, German, Italian, Polish, Portuguese (Braz), Slovak, Turkish.
- **Logarithmic Scales** - all displayed scales can be set as linear or logarithmic.
- **Enclosure rating** - standard NEMA 3 / IP55 type front face protection. NEMA 4X / IP66 available as an option.
- **Pulse Inputs** - The 8 Digital I/O option card has 4 channels that can be set as pulse inputs (first 4 channels). The operating frequency for pulse inputs on the Digital I/O card is 1kHz max.

- **Fuzzy Logging** - this standard feature provides a unique method to increase the storage capacity of the recorder. The data is monitored to determine changes in process data; if no changes are observed data is logged periodically. If data is changing rapidly, it is recorded normally at the programmed rate. By not logging data that is static, data compression of up to 100:1 or more can be achieved saving valuable memory.
- **Security tag** - “wire seal provision” that provides added security to seal the front door and rear wiring when using optional rear cover to prevent undetected entry to these areas of the recorder.
- **USB Ports** - Front and rear USB host ports for data and setup transfers or remote screen through these ports. Attach external devices (keyboard or mouse).
- **Replay with Zoom** - Select replay mode and zoom-in on a specific area on the screen. The data can easily be replayed at the recorder with the ability to “zoom”. The touch screen makes it fast to review and analyse historical data. A “jump” function allows you to go from any message list directly to the trend showing the occurrence of the alarm.

SX Standard Screens

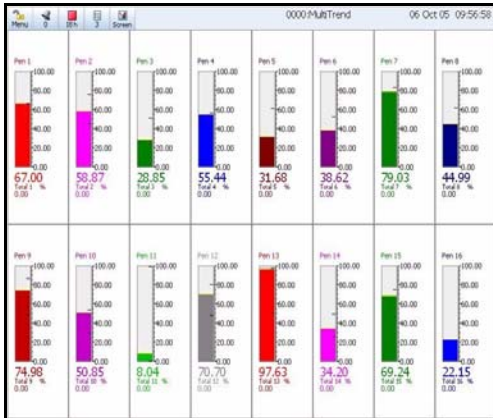

Up to 30 screens displaying multiple combinations of Charts, Bars and Digitals can be configured, 4 examples below.

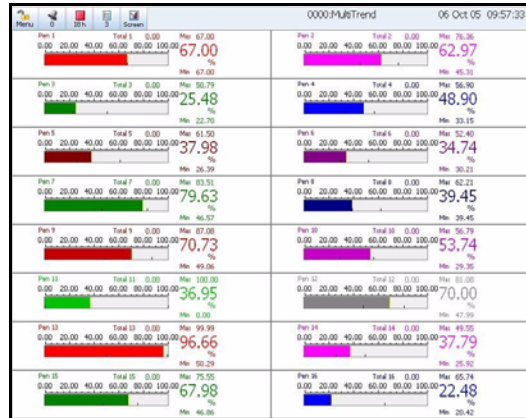

16 Digital Panel Meters

Horizontal Chart, 8 Vertical Bars & 8 DPMS

16 Vertical Bars

16 Horizontal Bars

Options - Hardware

- **Alarm Card** - 4 or 8 outputs relay contacts SPCO, 240V, 8 Digital I/O or 16 Digital I/O - SPNO 24VDC. Programmable alarm set points can be configured to activate up to 48 outputs.
- **Analogue Output** - 2 or 4 outputs available per card. Output type: 0-20mA or 4-20mA.
- **Nema 4X / IP66** - Nema 4X / IP66 protection available as an option.
- **Portable Recorders** - Portable cases available as an accessory item.
- **Digital Input** - 2 inputs on 8 channel Alarm card, 8 inputs on 8 Digital I/O card and 16 inputs on a 16 Digital I/O card. The digital inputs allow users to initiate, from a remote location via a dry contact closure, selected recorder functions.
- **Pulse Counting** - Up to four counting inputs per board, are available to count signals up to 25 kHz (max. 6 cards).
- **Approvals** - CSA, UL and FM CL1 Div.2 approvals.

- **24VAC/DC or 48VDC Power Supply** - 20 to 50VDC / 20 to 30VAC.
- **24VDC Transmitter Power Supply** - can supply up to 1Amp external transmitters.
- **Print Support** - Enables the printer option to print from various screens using a basic USB standard PLC printer.

Firmware Credit System

The credits system is a flexible way of adding to the recorder features without having to upgrade the firmware. Simply purchase a number of credits to cover your current and possibly future requirements and the recorder will be delivered with the credits loaded. The credit value in each recorder is displayed in the Factory menu. Select the Options button and by activating and de-activating the options in the credit list, the recorder will change its functionality. Any greyed out options on the list will mean there are not enough credits available for that feature on the recorder.

Credits can be applied as desired to the Firmware functions until the total number of credits purchased has been used up. Additional credits can be purchased later if new features are to be activated and not enough credits are available to support these additional functions.

On Table V of the **“Model Selection Guide” on page 13** select what firmware credits are required. Details of each firmware option are listed here in **Table 1 Firmware Options**.

Table 1: Firmware Options

Firmware option	Credit value	Description
Full Maths	4	Full Math - this can handle math expressions that can consist of expressions up to 100-characters in length. (Note 1)
Full Maths with Scripting	6	A powerful multi-line scripting ability available to solve complex state based applications. Eg.: “If .. X happens, then Y will happen, else .. Z will occur. (Note 1)
Events	6	Events are certain conditions or operations that can be set up and logged according to the time and date of an occurrence. Subsequently events can be reviewed or displayed on a graph. Events can produce the following actions: Mark on Chart, start/stop Logging, start/stop/reset Totalisers, Acknowledge alarms, Set/clear Relay and Reset max/mins. (Note 3)
Fast Scanning mode	5	For fast processes, the scan rate and recording of the data can be set for up to 50 times per second (20ms) for up to 16 inputs.
Totalisers/ Sterilisation calculation	4	Each pen can be associated with a totaliser. Using extra pens, the totalised values can be displayed and recorded; multiple totals can be calculated out of the same variable (weekly, monthly, etc.). The totaliser function can handle Fo and Po sterilisation calculation. (Note 1)
Custom Screens	4	Import custom built screens that have been created in X Series Screen Designer. (Note 2)
Health Watch/ Maintenance	2	The recorder keeps track of important “life actions” for improved diagnostics and preventative maintenance notification. Including Powered On, Last powered On, Time On since power up, Total On time, Total Off time, Longest Off time, Lithium cell life, Backlight life left at 100% brightness, Compact Flash insertions, Hi/Lo CJC value (Hi & Lo temps), Analogue In last factory/user cal, Relay operations.
Print Support	2	Enables the printer option to print text from various screens using a basic USB standard PLC printer.
Batch	3	The Batch function allows the user to segment portions of data for further analysis. Batch controls include Start, Stop, Pause, for viewing, Resume and Abort.
Groups	2	Groups of Pens can be specified and named with a Group number to display on the recorder.
Remote Viewer	3	Extends the user interface of the recorder onto the desktop PC. Providing full remote control of the unit launched from a web browser.
OPC Server	8	OPC (OLE for Process Control) - Software application for realtime interfacing between servers and clients. OPC is a software standard that defines common interfaces for data exchange between devices such as recorders, controllers, PLC’s and Windows™ based applications
Extra Pens (4)	2	4 extra pens to store and display totalised values, results of calculations, etc. Maximum is up to 48 extra pens for the SX recorder.

Notes

(1) Additional pens (“Extra Pens”) can be used to display and store the results of calculations, totalisers, variables imported via communications, or to store values.

(2) Custom Screens must be built using X Series Screen Designer (.lay). Screens from V5 Screen Designer cannot be imported (.lyt).

(3) Event markers are required to automatically reset the totalisers, for example on a periodic basis or on an external condition. (Not necessary if the totalisers are reset manually).

The TrendManager Pro Software Suite

The TrendManager Pro Software Suite complements the capabilities of the “X Series” recorders by providing the benefits of viewing, configuration, network communications, database management, data analysis and report generation using a personal computer. It ties the process together, providing for real-time communications with the recorders through a Local Area Network (LAN).

TrendViewer

TrendViewer - is the standard software provided with the recorder that displays and prints data imported from the storage media used by the recorder.

TrendManager Pro

TrendManager Pro is an advanced data analysis/archiving software package, providing full configuration of the recorders.

TrendManager Pro is a stand-alone package that delivers to the user total recorder configuration, allowing the user to archive, graph, print and export data. TrendManager Pro also allows files to be exported using comma separated variables (CSV) format, that can be imported in most computer software.

TrendServer Pro

TrendServer Pro is a fully network aware software package for real-time viewing and archiving of data with communications to the recorder. It supports all the capabilities of TrendManager Pro plus real-time data acquisition and web browser access. TrendServer Pro provides secure multi-level, multi-user access to the recorder data by various departments with security. Standard features of TrendServer Pro include data archive tools, graphing, print import and export data facilities.

TrendServer Pro with OPC Server - provides the same functions as the TrendServer Pro but includes the added function of an integrated OPC Server to allow easy interfacing to third party HMI software packages that support an OPC Client. This provides a real-time interface between servers and clients.

Database Management Tool

Database Management Tool - this software application works with TrendManger Pro and TrendServer Pro to provide safe administration of data with tools to archive, sort, move, copy and delete the data stored in local and remote databases. The Database Management Tool software is supplied with TrendServer Pro.

X Series Screen Designer

X Series Screen Designer - is a separate software package that enables the user to design unique display layouts for transfer to the recorder's screen. Screen layouts can be created using any combination of indicators such as Trending Charts, Digital Panel Meters (DPM) and Bar graphs. Flexibility allows each type of indicator to have elements of its appearance changed to create an individual presentation. The X Series Screen Designer software package is compatible with Minitrend QX and Multitrend SX recorders. Layouts can be transferred on to single or multiple recorders of the same type, which contributes to continuity and standardization of process data..For use with X Series recorders only.

Minimum System requirements for TrendViewer, TrendManager Pro and X Series Screen Designer:-	Minimum System requirements for TrendServer Pro:
1GHz Pentium processor or higher	1GHz Pentium processor or higher
CD-ROM drive	CD-ROM drive
Monitor screen resolution 1024 x 768 recommended minimum, high colour	Monitor screen resolution 1024 x 768 recommended minimum, high colour
Windows™ 2000, XP, NT ver. 4.0 Service pack 6 onwards	Windows™ 2000, XP, NT ver. 4.0 Service pack 6 onwards
512 Mbyte of RAM (min 512 Mbyte recommended)	512 Mbyte of RAM (min 512 Mbyte recommended)
16 bit colour graphics, 24 bit recommended (Screen Designer only)	TCP IP installed
50 Mbyte free hard disk space	2 Gbyte Hard-drive free disk space
A mouse	A mouse
Flash card reader or USB port	Flash card reader or USB port

Specification	Design Attributes
Digital indicators and Display	<p><i>Display size and Type:</i> 12.1" diagonal, Digital Colour LCD (TFT) with Touch Screen Industrial grade with brightness adjustment and wide viewing angle</p> <p><i>Resolution:</i> SVGA (800 x 600 pixels).</p> <p><i>Screen Saver:</i> Set in minutes from 1 to 720, can be set to dim the screen or to switch off.</p> <p><i>Brightness adjustment:</i> Adjustable between 10 and 100%, default set to 80% brightness.</p> <p><i>Backlight life time:</i> 43,000 hours to half brightness when used at 100%, (67,000hr if used at 80%). Maximum luminosity 400 cd/m².</p> <p><i>Touch Screen life:</i> 1,000,000 touches</p>
Display Update Rate	Display values updated every second
Status Display	A status bar, at the top of the recorder's screen, displays the real-time icons of the recorder status, such as Recording Time left and alarm active.
Communications	Ethernet 10/100 base -T with RJ45 connector supporting Modbus/TCP, Internet, DHCP or fixed IP address. RS485 Modbus RTU (up to 115200 Baud Rate).
Mathematics	Basic Maths include Add, Subtract, Multiply, Divide, Modulo and power. Full Maths and Scripting (option) support up to 100 character free form math expression for each pen. For example: SINE, COS, TAN, Log, Parenthesis (eg. A1 + A2), comm variables, free memory, and access to any data item variable (A1, P1, D1 etc.).
Front and Rear USB Ports	USB host ports front and rear for data and setup transfers through these ports. External devices keyboard or mouse, Barcode reader, or external mass storage device. (USB 1.1 compliant)
Standard Screens and Custom Screens	Fully programmable display values in engineering units. Time & date stamp on every division. Sets of Standard screens are available to display data on a chart, digital reading, bargraphs or numerous combinations thereof. Screen properties can be modified on the recorder and customised to suit. Custom screens created in the Screen Designer software can be imported into the recorder for specialist applications. Custom Screen firmware option is required. Digital values displayed include alarms on bars, engineering units, pen name, tag, time and date, 20 character description and totalised values.
Data Storage	<p><i>Removable Media:</i> Compact Flash card, supports up to 4.0 Giga bytes.</p> <p><i>Local Mass Storage Options:</i> USB memory key - up to 2Gb, USB hard drive - up to 120Gb.</p> <p><i>Internal Data Buffer:</i> Non-volatile. 70MB (16 million acquisition values) upwards to 1850MB (400 Million points)</p> <p><i>Setup and screens:</i> Stored internally on non-volatile memory</p> <p><i>Manual Saving:</i> Data saving by inserting compact flash card or USB memory stick</p> <p><i>Data Saving Period:</i> Related to log rate, number of pens, totals and alarms. Each pen is capable of its own independent storage rate. (20mS to 60h)</p> <p><i>Data Format:</i> Honeywell binary encoded format</p> <p><i>Recycling Mode:</i> Internal memory has FIFO (First In First Out) capability where the newest data over-writes the oldest data.</p>
Power Requirements	<p><i>Voltage (VRMS):</i> 100VAC to 250VAC (auto select). Frequency: 50/60Hz</p> <p><i>Power Consumption:</i> <60W.</p> <p><i>Optional instrument power Voltage:</i> 20 to 55VDC/20 to 30VAC. Power Consumption: < 60 watts</p>
Common Relay Output (SPNC)	NC common alarm relay: Two contacts, normally open when the recorder is powered (no active alarms). Rating 24V, 1 Amp.
Battery	Battery backed up for clock, Lithium battery Type 6032, 3.0V – 10 years life (Recorder powered), 4 years life, typical (Recorder unpowered).
Password Protection	Multiple Administrator control of password setup and management with four levels of password protection for – Engineer, Supervisor, Technician, and Operator. Password protection restricts user entry to the recorder set up and specific screens. Engineer – Highest access to all levels, Supervisor, Technician and Operator. Supervisor – 2nd highest level including Technician and Operator access Technician – 3rd level including Operator access Operator – 4th and lowest level of access.
Languages	English, French, German, Italian, Polish, Portuguese (Braz), Slovak, Turkish.
Temperature Units	°C, °F, °K

Specification	Design Attributes
Recorder Identification	Status bar: Alternately displays Recorder ID and Recorder Screen Name. Displays Time and Date.
Clock	Accuracy: ± 29 ppm (± 1 minute/month) @ 25°C. Summer/Winter manual or automatic time adjustment or via communications. SNTP Client and/or Server included for synchronising over Ethernet.
Alarm Set Points	6 per pen integral "soft" alarm set points easily set by user to announce selected out of limit conditions; user can select if an alarm triggers a change in the screen background colour. Alarm triggers can be set for Hi, Lo, Deviation (latched or unlatched) for alarm acknowledgement. Alarm Damping – 1 sec to 24 Hours; Hysteresis - +/- 100% of pen scale Common relay output: 1A 24V, can be activated on any alarm.
Data Replay Mode	Data replay facility on chart displays at normal, fast or slow speeds with zoom and cursor.
Display Chart Speeds	Chart rates: 1 mm/hour, 5 mm/hour, 10 mm/hour, 20 mm/hour, 30 mm/hour, 60 mm/hour, 120 mm/hour, 600 mm/hour, 1200 mm/hour, 6000 mm/hour. Combinations of rates can be mixed and chart speeds can be set independently for each chart. Display speeds are independent of logging rate.
Messages Screen	The message screen displays system information and records any setup activity that has been changed. It also provides warning and error message updates, lists alarm activity and will display user defined marks on a chart.
CE Conformity (CE Mark)	This product conforms with the protection requirements of the following European Council Directives: 73/23/EEC, the Low Voltage Directive, and 89/336/EEC, the EMC Directive. Conformity of this product with any other "CE Mark" Directive(s) shall not be assumed.
Immunity Product Classification	Complies with EN61326 Class I: Cord Connected, Panel Mounted Industrial Control Equipment with protective earthing (grounding). (EN 61010-1)
Enclosure Rating	Front panel designed to NEMA3 / IP55 (Optional NEMA 4X / IP66)
Installation Requirements	Category II: Overvoltage (EN 61010-1) Pollution Degree 2
EMC Standards	Emissions - EN61326 Class B Immunity - EN61326 Industrial Levels
Safety	Complies with EN61010-1: 2001. Panel Mounted Equipment, Terminals must be enclosed within the panel.

Specification	Analogue Inputs
Number of Inputs	4, 6, 8, 12, 16, 24, 32, 40 or 48 input channels
Input Types	mV, V, mA with external shunt (provided as standard), Thermocouple, RTD and ohms
Minimum Input Span	Range is fully configurable with span limitation of the operating range selected with 4% under range to 4% over-range capability (50V Range 2%)
Burnout (T/C)	Active (High or Low), Passive and Health watch/Maintenance (option).
Cold Junction Compensation	Internal compensation with the ability to manually adjust values, External Input for compensation, External CJC value specified
Input Resolution	0.0015% (16 Bit ADC)
Input Impedance	Current loop resistance: 10 ohms, use $\pm 0.1\%$ external resistor. Volts $> 1M\Omega$, all other $> 10M\Omega$
Source Impedance	T/C and RTD: 100 ohms per lead maximum (Cu10 = 15 ohms)
Square Root Extraction	Available as standard on every input type
Sensor Compensation	Single point and Dual point

Specification Analogue Inputs	
Input Sampling Rate	Recorder has 6 available slots with up to 8 analog inputs each; the input sampling rate is dependent on actuation type. All Inputs: 100mS (10Hz), 200mS (5Hz), 500mS (2Hz) Fast Sampling: 20mS (50Hz) - mA, mV, Volts and Ohms only
Scales, Linear & Logarithmic	Normal and Scientific notation Decimal Point automatic or programmable Engineering units, user definable (10 characters) Logarithmic Decade limits: -38 min, to +38 max, (recommend up to 20 decades on one screen to ensure clarity)
Input Isolation	300VAC channel-to-channel, channel-to-ground
Noise Rejection (at 50/60Hz) +/-2%	Common mode: 2Hz = -120dB, 5Hz = -120dB, 10Hz = -120dB Normal Mode: 2Hz = -85dB, 5Hz = -80dB, 10Hz = -48dB

Specification Logging	
Logging Method	Sample, Average, Min/Max - can be set independently per pen
Logging Types	Continuous, Fuzzy
Logging Rate	From 20 msec. to 60 hours per pen
Fuzzy Logging	A secure data storage technique which delivers data compression ratio of 100:1 or more; self teaching, storing the data at a variable rate to match the process

Specification Physical Parameters	
Enclosure/Bezel	Zinc plated steel case with high impact resistant polycarbonate bezel; scratch resistant lens. NEMA 3 / IP55 protection rating standard, Optional NEMA 4X / IP66 (Front face only)
Mounting Panel	Unlimited mounting angle. For the best view of the display the viewing angle should not exceed 70° from the left or right, 45° looking down and 55° looking up at the recorder display. Mounting adjustable for panel thickness of 2mm to 20mm. Adapter kits available for covering existing panel cutouts.
Dimensions	W: 288mm (11.34"), H: 288mm (11.34), D: 200mm (7.87"). Additional 80mm (3.15") clearance recommended for a straight type power cable and signal connectors. Cutout 281 x 281mm (11.06 x 11.06")
Weight	10 Kg (22 lb) max.
Colour	Bezel: Black
Wiring Connections	IEC Power Plug. Removable terminal strip for input and alarm connections

Input Range Performance and Accuracy

Reference Temperature: 22°C

Reference Sample Rate: 2Hz (500msec)

Reference Humidity: 65% RH +/-15%

Long term stability: 0.2%/year

* Does not includes reference junction calibration of ± 1.0 °C using the standard "ice bath" method of calibration. Factory accuracy can be improved by performing a field calibration. Also does not include any error on the sensor.

** Tolerance for these input types includes that of the external shunt resistors (0.1% tolerance)

*** Reference Accuracy can be improved to +/- 0.4°C/0.7°F using the single point compensation calibration

Specification	Options
Pulse Input (optional)	4 isolated inputs per board, frequency – 1Hz to 25kHz, updated once per sec. Input: Low < 1V, High >4V to <50V or Volt free input: Low = short circuit, High = open circuit.
Alarm Outputs (optional)	Programmable alarm set points (6 per pen) can be configured to activate up to 48 outputs. Update rate: 200 ms for all alarms. Number/Type: <ul style="list-style-type: none"> • 4 or 8 relay contacts SPDT, 3A 240VAC, 3A 24VAC/DC, 0.2A 240VDC (non-inductive, internally suppressed) • 8 I/O or 16 I/O - SPNO 1A 24VDC (non-inductive, internally suppressed) Activation: Fully programmable internal alarm levels. Assignable to any relay output.
Digital Input/Output	8 I/O or 16 I/O: all channels may be selected freely as either digital inputs or outputs. The Digital I/O card also has 4 channels that can be set as pulse inputs (channels 1 to 4). The operating frequency for pulse inputs on the Digital I/O card is 1kHz max. 4 relay outputs: all four channels are relay outputs only. 8 relays/ 2 DI card: two outputs can be configured for use as digital inputs: A digital input is provided by a volt free contact between the normally open (NO) and the common (C) terminals of an output relay. If the 2 Digital inputs are used only 6 relay outputs are available. Closed <500 ohms, Open >300 kohms.
Custom Screens (optional)	Provides the capability in the recorder to accept custom screen designs from the Screen Designer.
Events	User defined process events are recorded and can be set to cause particular recorder actions. Events can consist of recording start/stop, digital inputs, alarms, totalising actions, timers, barcode, etc. Once an event has been caused it can produce a definable set of effects on the recorder which can include, mark on chart, relay outputs, recording control, totalising actions. Each event marker can be recorded for analysis using the TrendManager Software Suite.
OPC Server (optional)	OPC 3.0 DA compliant. Totalisers and up to 96 pens can be transmitted via OPC server, max poll rate 1/s.
Analogue Outputs (Re-transmission Outputs) (optional)	2, 4, 6 or 8 re-transmission outputs available; a pen drives each output. Analog inputs, totalised values or any mathematical result can be re-transmitted. Update Rate: 250 msec all channels Accuracy: $\pm 0.1\%$ 0-500 Ω load, +/-0.25% 500 Ω 1K Ω load Type: 0 to 20 / 4 to 20 mA Maximum Load Resistance: 1000 Ohms Resolution: 0.002% Isolation: 300VAC
Health Watch/Maintenance Capability (optional)	The recorder keeps track of important "life actions" for improved diagnostics and preventative maintenance notification. Including Powered On, Last powered On, Time On since power up, Total On time, Total Off time, Longest Off time, Lithium cell life, Backlight life left at 100% brightness, Compact Flash insertions, Hi/Lo CJC value (Hi & Lo temps), Analogue In last factory/user cal, Relay operations.
Agency Approval (optional)	CSA (Optional) CSA22.2-No.1010.1-2004 Certificate Number L211230. UL (Optional) ANSI/UL61010-1-2004 File # 201698. FM Class 1 Division 2 (optional)
Transmitter Power (optional)	1 Amp @ 24VDC \pm 3VDC.

Specification	Options
Extended Security System (ESS) (optional)	Provides full support for 21 CFR Part 11. Includes features for entry of unique User ID's and associated passwords, timeout on inactivity (1 to 10 min.), password expiration (1 to 365 days), up to 50 users, password re-entry lock out for incorrect entry of password more than 3 times, no re-use of passwords (programmable 4 to 12 times), traceability by user name
Totaliser/Sterilisation* (optional)	One totaliser per input. Totaliser value must be assigned to a pen for display and storage. Multiple totalisations (Maths option) are possible with the use of extra pens (option). Reset may be manual or programmed. Totalisation values are ten digits plus exponent. Each pen can be totalised according to the Fo or Po sterilisation* function at 250 °F (121.11°C). The Standard Reference Temperature and Thermal Resistance (Z Value) are fully adjustable values of X, Y, W and V. Start temp, Reference temp and Z factor are all user defined, allowing support for many different types of sterilisation applications.
Batch	The Batch function allows the user to segment portions of data for further analysis. Batch controls include Start, Stop, Pause, for viewing, Resume and Abort.
Print Support	Enables the printer option to print from various screens using a basic USB standard PLC printer.
Math Algorithms (optional)	All analog input channels have a math expression text block. This is a fully user programmable 100 character free form math expression for each pen. Math calculations are available on all pens, one per input plus 48 extra pens for the SX recorder. Scripting maths includes conditions and multi-line scripting in pen maths expressions. Allow functions, permanent variables and constants, timers. 500 characters maximum per pen.
Miscellaneous	Optional customer ID Tagging (3 lines of up to 22 characters each line).

*Specification table for Sterilisation: The definition of Fo/Po is the sterilisation/pasteurisation time in minutes required to destroy a stated number of organisms with a known z at temperature T. For example, "F18/250" represents the time in minutes required to destroy a stated number of organisms at a temperature of 250°F (121.11°C) with a z = 18 degrees F. F values are used to compare the sterilizing values of different processes, however, F values cannot be compared unless the z values are the same. When temperature is not specified (for example, F = 8.6) it is understood that the temperature is 250°F (121.11°C); the subscript O (as in the term Fo = 7.4) is used to indicate that the z = 18 degrees F and the temperature is 250°F (121.11°C).

Specification	Environmental and Operating Conditions			
Parameter	Reference	Rated	Extreme	Transport & Storage
Ambient Temperature	67 °F to 77 °F 19 °C to 25 °C	32 °F to 122 °F 0 °C to 50 °C	32 °F to 122 °F 0 °C to 50 °C	-14 °F to 140 °F -10 °C to 60 °C
Relative Humidity (%RH)	50 to 65*	10 to 90*	5 to 90*	5 to 95*
Vibration				
Frequency (Hz)	0	0 to 70	0 to 100	0 to 100
Acceleration (g)	0	0.1	0.2	0.5
Mechanical Shock				
Acceleration (g)	0	1	5	20
Duration (ms)	0	30	30	30
Mounting Position from Vertical				
Tilted Forward	5°	40°	40°	Any
Tilted Backward	5°	65°	65°	Any
Tilted to Side (+/-)	5°	65°	65°	Any
Power Requirements				
Mains Voltage (Vrms)	220 to 240	100 to 250	90 to 264	N/A
Low Voltage AC (Vrms)	24 +/- 2	20 to 30	20 to 30	N/A
DC Voltages	24 +/- 2	20 to 55	20 to 55	N/A
Frequency (Hz)	49.8 to 50.2	47 to 63	47 to 63	N/A
Power Consumption	AC: <60W (max), DC: <60W (max). Typical 30W			
Warm Up	30 minutes minimum			
Seismic Qualification	Complies with IEEE 323-1974 and/or 1983 and IEEE 344-1975 and/or 1987 (optional)			

* The maximum rating only applies up to 104°F (40°C). For higher temperatures, the RH specification is de-rated to maintain constant moisture content
